

**Rivercity Innovations, a Saskatchewan based IoT technology solution provider focused on food-tech, announces integration of their cold chain temperature monitoring solution with the leading restaurant team management platform, 7shifts.**

(Tuesday June 6, 2023) – Saskatchewan-based tech startup **Rivercity Innovations** (RCI) is pleased to announce the launch of the integration of their IoT cold chain monitoring sensors and software with that of the leading restaurant team management platform, **7shifts** who is also Saskatchewan based - a “Made in Saskatchewan” success story between our two tech companies. RCI will be delivering its IoT based temperature monitoring services to 7shifts clients where those clients elect to adopt it. The result for the 7shifts client adding RCI’s tech to their system is less food loss, automated digitization of food safety compliance data, improved food quality due to temperature control monitoring, and reduced staff time spent collecting data on food temperatures in storage at restaurants.

Jeff Shirley, CEO of RCI states “Working with 7shifts on this cold chain monitoring integration was an absolute pleasure. The 7shifts restaurant management software solution is the leader in the restaurant industry in North America, so bringing our technology to their over 40,000 clients is an honor. The fact we are both based in Saskatoon, Saskatchewan speaks to the quality of technology and innovation coming from our prairie province right here in Canada. Our solution is operational across Canada, USA, and Spain today. We offer the platform in English, French, and Spanish.”

Rivercity Innovations delivers IoT solutions for cold chain monitoring of food services businesses including grocery, pharmacy, and restaurants. Our related solutions include options for last mile delivery, GPS tracking, and telemetry collection in ag-tech. Rivercity manufactures its own sensors and software right here in Canada, ensuring our solution is secure and modern from end to end. #### ABOUT RIVERCITY INNOVATIONS

 **Rivercity**  
Innovations

Saskatoon-based Rivercity Innovations builds world-class sensors for IoT solutions, including GPS, temperature, moisture, humidity, and other data, and is backed by investments from Conexus Venture Capital Inc. with support from Golden Opportunities Fund, Tribune Capital, and Startup TNT. It is known for its unique LoRa IoT solutions for industries requiring telemetry data. Its solutions include everything from GPS tracking to environmental monitoring for commercial property owners, but are primarily focused on cold chain monitoring. RCI deploys temperature monitoring solutions to grocers, restaurants, and pharmacies across North America and Europe for cold storage alerts and reporting compliance for those businesses.
