If You Are...

Frustrated by easily avoidable mishaps.

Exhausted by repeated failures.

Lacking real-time monitoring across the entire cold chain.

Prevent Catastrophe

No more major asset losses due to:

- Human error
- Staff shortages
- Complacency
- Negligence
- Equipment failures

No more costly refrigeration oversights

No more spoilage during transport

Hot To Cold, We Have You Covered

Interchangeable, compatible, and flexible temperature and humidity monitoring you can trust.

Adaptable across all temperature controlled environments.

Beat the Heat.

We exist to automate your temperature monitoring.

Rivercity Innovations

1 Automate

- Effortless automation of manual tasks.
- Peace of mind through technology and alerts.
- Keep your focus where it is most beneficial.

2 Digitize

- Get information quick, accurately, and now resulting in informed proactive decision making.
- Painless real-time compliance reporting.
- Enhance sustainability with our proprietary ecosmart calculator.

3 Prevent & Predict

- Unnecessary waste caused by faulty equipment, complacency, or negligence.
- Loss by safeguarding against claims.
- Unwanted media attention and brand damage.
